Saint Peter in Eastgate was built in 1881 and is a Grade II listed building. The works were carried out using sympathetic materials and techniques including bespoke limestone mullioned windows, feature stonework, traditional timber roof with reclaimed Welsh slate and the use of lime mortar. The works comprised the construction of a single story extension to provide additional teaching and administration areas.

Some internal remodelling of the existing building was carried out to form an office together with surface water drainage and localised external works.
